

Know Your Data Is Safe

Since 1968, Perpetual Storage, Inc. (PSI) has provided secure vital records storage in a paper-free environment, making it the most innovative, established, and protected storage facility in the world.

Off-Site Storage

Perpetual Storage, Inc. is a privately operated, woman-owned, maximum-security datacenter and data storage facility located in a secure, underground vault near Salt Lake City, Utah. Since 1968, PSI has stored digital and microform media for our clients, ensuring that should disaster strike, they can rest easy knowing that their critical data is stored in one of the safest storage facilities on the planet.

The world-class security offered by PSI begins with our location which is virtually undetectable from the outside, but that's far from where it ends. We've taken every precaution and left no stone unturned to ensure that your irreplaceable data will remain safe on our watch.

Features and benefits of PSI's vault facility:

- 24/7/365 Availability
- Safe from natural and man-made disasters, including:
 - Earthquake, Flood, Fire, Extreme Weather
 - Electromagnetic Pulse (EMP) attack
 - 1 kiloton airburst within a 1/4 mile of our facility
- Exceeds DoD and ANSI standards for the storage of vital records
- Temperature and humidity controlled
- Paper-free, non-flammable vault
- Multiple layers of security
- Redundant and diversely routed systems
- Armed security team

As your partner in data protection, our priority is to assist your team in disaster recovery planning and accelerate your response time toward recovery. By providing off-site redundancy, Perpetual Storage gives your company peace of mind that your data will be restored as quickly as possible.

Courier Service

Perpetual Storage does more than manage and store your vital records; we also offer seamless access to your business information 24/7/365

Your records are available for immediate retrieval and delivery with our in-house courier service. Local clients can have their materials picked-up and delivered by PSI's insured courier service. Out-of-area clients can have their materials picked-up and delivered next day by any national delivery service such as UPS or FedEx.

The same care and security measures used to store records properly and securely are utilized while managing and delivering the same records. Our trained couriers drive unmarked, security enhanced vans for maximum discretion. The delivery vehicles have GPS enabled devices for precise location tracking as well as multiple means of communication to the vault facility. A clear chain of custody is preserved for all materials entering or leaving the underground storage facility. Our professional couriers carry distinct photo ID badges and uniforms and must pass rigorous criminal

background and drug screening checks, as well as sign a confidentiality agreement.

- **Prompt Access to Your Vital Data** – Your records are available for immediate retrieval and delivery 24/7/365. We offer same day delivery, next day delivery, and emergency after-hours delivery.
- **Scheduled Courier Service** – We offer daily, weekly, monthly, or custom schedules for clients who need to rotate or transfer data regularly. Our vault personnel will manage your delivery schedule so you can focus on other priorities.
- **Secure Delivery of Your Data** – Strict chain of custody protocols are followed at all times by our couriers. We have constant communication with couriers and constant tracking of couriers and courier vehicles.
