## About Perpetual Storage, Inc

Open since 1968, Perpetual Storage, Inc. (PSI) is a climate controlled vital records storage & maximum security vault facility located inside a solid granite mountain near Salt Lake City, Utah. PSI provides disaster recovery, backup, long-term and genealogical storage services for physical media, GoBoxes and digital data in a facility that was built to exceed Department of Defense standards. It is one of the most established, cutting edge and safest off-site storage facilities of its kind in existence. PSI's services are available 24/7/365. It has been privately owned and operated for over 50 years and is a certified 'Woman-Owned Small Business'.

# Protecting History for Every Generation

## What Makes the Family GoBox Unique?

The Family GoBox program preserves your most valuable family treasures and memories in a military-grade, airline-approved box. The GoBox is stored at Perpetual Storage inside a solid granite mountain in a climate-controlled, maximum-security vault protected from earthquake, flood, fire and other natural disasters. The program ensures 24/7/365 availability with more space and lower costs than a safety deposit box. You can request courier or mail-delivery services to have your box picked up and delivered right to your door. No other storage vault protects your precious items more securely and safely than the one protecting your Family GoBox.

Storage units are not always ideal for protecting your most treasured family memories and valuables. Our security vault provides the protection you need from:

- Temperature & Humidity Fluctuations
- Loss due to Data Degradation
- Theft
- Natural Disasters

Get all of this and more when you store your Family GoBox in Perpetual Storage's maximum security vault.

## Stored At Our Secure Vault

Perpetual Storage, Inc. is a unique off-site maximum security storage facility located inside a solid granite mountain. Unmatched in security, it was built to exceed stringent U.S. Department of Defense requirements for the protection of critical records. It can withstand any natural or man-made disaster and is protected by 200 feet of solid granite, armed guards and the most sophisticated security surveillance equipment. It is one of the safest facilities of its kind in the world.
